Ethernet to Wifi bridges

2020/03/09

We currently have a wireless network in our home. My wife uses a "wifi only" tablet at the opposite end of the house from where the wireless router is located. She currently has a less than adequate connection. I am hardwired and to the router and get about 100 mb/sec and she gets about 15mb/sec with the tablet. I wish to run an ethernet cable from the router location to the opposite end of the house. I am trying to find a device to convert from an ethernet hardwired connection to wifi only. Can someone please help? Thank you.
